The categories above are guidelines only and a prefix of 'generally' should apply in all cases! There may be climbing or bulbous rock garden plants, or climbing annuals.....

Please note this list is entirely reliant on seed collector's notes.

All seeds are a result of open pollination and there is always a possibility of seedlings not coming true.

Cultivar names are given as guidance of parentage only, please do not distribute under cultivar name.

I have tried to follow the names as per Plant Finder, some are only listed in a few nurseries if at all, and I have added synonyms/old names where appropriate.

Errors and omissions are entirely mine and I am happy to receive corrections or suggestions, indeed all comments welcome.

Seed donations are always welcome from March to end December 2020 in paper envelopes or bags with the full plant name please if possible, and name and address and/or email of sender.
